## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

### **DETAILED ACTION**

1. The response filed on 3/18/10 in response to the restriction requirement dated 2/2/10 has been received and considered. Applicant has cancelled Claims 1-81 and added new Claims 82-96.
2. This case has been transferred to Examiner Mary Jacob. Contact information is below.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with G. Peter Nichols, Reg. No. 34,401 on 5/19/10.

The application has been amended as follows:

Abstract, line two, the word "In" has been changed to --in--

Page 5, line 32, ".in" has been changed to --in--

Page 6, line 6, "value." has been changed to --value--

Page 12, line 5, ".vs." has been changed to --vs.--

Page 20, line 21, the phrase "blocks, each" has been changed to --blocks (3, 4), each--

Page 20, lines 24-25, the phrase "blocks/clumps/panels are" has been changed to --blocks/clumps/panels (3, 4) are—

Page 28, line 4, the phrase "randomly, with" has been changed to --randomly 55, with--

Page 45, line 22, "Figure 10" has been changed to "Figure 17".

***Allowable Subject Matter***

4. **Claims 82-96** are allowed.

5. The following is an examiner's statement of reasons for allowance: While **Hochbaum et al** ("Performance Analysis and Best Implementations of Old and New Algorithms for the Open-Pit Mining Problem", Department of Industrial Engineering and Operations Research, University of California at Berkley, January 16, 1998) teaches a method and apparatus comprising a processor for representing a mine having at least one pit comprising obtaining a block model of the pit in which material is divided into a plurality of blocks, the block model representing the mine (section 1, paragraph 1; page 3, paragraph 7), defining ore clusters (section 4.1, paragraph 1), forming a cone for an ore block propagating upwardly by precedence arcs extending from each block, (page 13, paragraphs 1 and 2) and methods for determining a sequence of extraction of the blocks (section 1, paragraph 4; page 13, paragraphs 4 and 5); **Gershon** ("Heuristic Approaches for Mine Planning and Production Scheduling", International Journal of Mining and Geological Engineering, 1987, 5, pages 1-13) teaches a block model, block sequencing and cones generated upward and downward to determine blocks for

extraction (pages 7-9, "Heuristic No. 2-an algorithm for block sequencing") and taking into account how long it will take to reach an area of the mine (page 10, paragraph 2), **Underwood et al** ("A Mathematical Programming Viewpoint for Solving the Ultimate Pit Problem", European Journal of Operational Research, 107, pages 96-107, 1998, cited on 8/29/06 IDS) teaches a block model (Figure 1) and forming cones for the blocks (section 2, paragraph 1; Figure 9), and Henriksson et al (US Patent 3,692,364) teaches a method of mining an ore body using open pit mining techniques, **none of these references taken either alone or in combination with the prior art of record disclose** a method and apparatus comprising a processor for transforming a representation of a mine having at least one pit specifically including

(claims 82, 90), "...processing the blocks of the block model...to define a plurality of clusters each comprising a plurality of blocks..."

"forming...a cone for each cluster propagating upwardly by precedence arcs extending from each cluster..."

"defining....clumps of material from the intersection of the cones, the clumps comprising volumes of material not crossed by precedence arcs..."

"generating...an initial block sequence from the defined clumps, the block sequence representing a potential order of extraction of blocks from the mine..."

"determining...a value for time of extraction for each of the blocks of the block model from the block sequence..."

"reprocessing the blocks of the block model...based on the determined time values to define a plurality of revised clusters and processing the revised clusters with

the processor to define a plurality of clumps representing the mine”

**in combination with the remaining elements and features of the claimed invention.** It is for these reasons that the Applicant’s invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
